

## **SERDAR ZEREN SECONDARY SCHOOL ESAFETY ACTION PLAN-2023**

Serdar Zeren Secondary school has an eSafety action plan per year. All the teachers at the school are responsible for implementation of eSafety Policy. Nihal Tuđlu leads the activities about eSafety. She is called the eSafety Coordinator of the school. She directs and gives information about new threats to eSafety, new developments in the use of technologies. In our school we have interactive boards so we use technology actively during our lessons.

All the teachers and all the students are very active while using interactive boards. We use various educational sites during the lessons. We have important details about healthy use of online Technologies in our school eSafety policy. Our school counselor helps us to inform our students about using the internet, anti-social behaviors on the net and anti-bullying. We have really strong contacts with our parents. They are all eager and willing to learn about Internet safety. We have common meeting nearly per month about students and their behaviors.

Our school policy is clear and easy. We have asked some basic details to the students while creating our school eSafety policy. In our policy we have some rules about using mobile phones at school. During class time, they should leave their mobile phones into the mobile phone closet prepared for all classes at school. They should be kept in a cabinet as a secure place. At the break time and after school (course time) they are allowed to use their mobile phones. During the class time, it is prohibited to use their mobile phones or tablets. But it is permitted to use mobile phones for eTwinning activities with the guidance of their teacher at the school time.

Our school parents are informed about our school's mobile device policy at the beginning of the year. They are informed about the reasons and results of this policy. If the students forget to take their mobile phone, it will be kept in a secure place until the following day.
